

Scarless Silicone Gel

Advanced Triple Formula Scar Gel with Silicone Oils, Vitamin C, and Squalene

A topical gel for the management of scars and for the prevention of hypertrophic scars. Self-dries and helps soften, flatten, and smooth the scar, while maintaining the moisture balance and elasticity of the skin. Reduces the discoloration and itching associated with scars.

Silicone Oils

Act as mechanical barriers that close off the scar's surface, which protects from microbial contamination, prevents infection, improves hydration, ensures less collagen is created, reduces redness and thickness, and softens the scar.

Vitamin C

Boosts the immune system, and aids in the healing, fading, and prevention of scars. Regulates healthy collagen formation, helps reduce the size and appearance of the scar, and reduces discoloration. Helps combat free radicals that can cause severe and permanent cellular damage to the skin.

Squalane

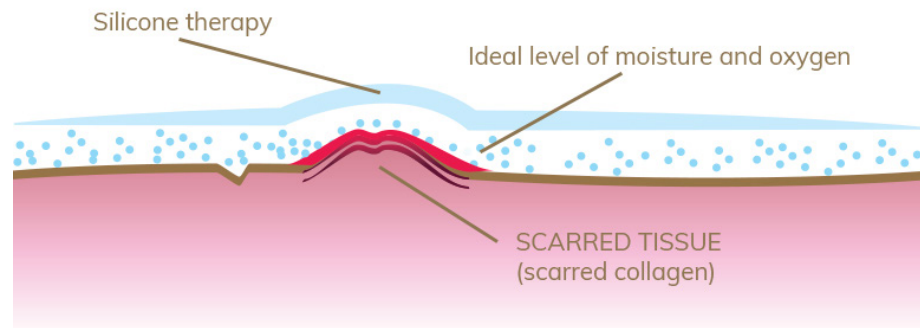

Squalane is derived from, Olive Oil. It provides revitalization of the damaged skin and stimulates healthy healing. Lubricates and shields the skin's surface. Helps stimulate cell growth and regeneration. It is also very effective with reducing of Acne Scars.

Mechanism of Action

Scarless forms a protective barrier against chemical, physical and microbial invasion, while assisting with hydration. Squalene contributes to scar healing by reducing Reactive Oxygen Species levels which act as free radicals and delay scar healing.
